RB2000 LIFT: SIMPLIFYING DEBRIS MANAGEMENT

The Equipter® RB2000 lift offers a unique option unavailable anywhere else. It's compact, lightweight, and self propelled, enabling you to improve efficiency and debris management.

BENEFITS OF THE RB2000 LIFT SERIES

The Equipter® RB2000 lift can be driven, raised, and dumped. Now you're able to get into those tight corners and still be in control of your debris. Impress your customers with the ability to reach those hard-to-get spaces and drive their debris away.

RB2000 FEATURES

LIFTABLE

The Equipter RB2000 lift can raise up to 7 feet, increasing efficiency and production on the jobsite. This allows the container to be close to the roof, ensuring debris will not damage your clients property.

DRIVABLE

The RB2000 lift is self-propelled with a gasoline powered hydraulic system. The lightweight design ensures no lawn damage to your customers. With its small frame you can now reach narrow areas.

DRIVE SYSTEM

Driving around the jobsite is simple, its hydrostatic drive system is powered by a 8.5 horsepower Honda engine.

COMPACT

The RB2000 lift was specially designed to be small enough to fit into tight spaces, yet big enough to contain your debris. It's aluminum container is durable, rust proof, and lightweight.

DUMPABLE

Once you've filled the container simply drive it to your desired location, lift, and dump. It's really that easy. Cleaning up has never been as simple.

TAILGATE

The tailgate feature allows you to dump the debris out of the container from any position.

WIDE TIRES

With the RB2000's wide tires, you can ensure minimal to no tracks in lawns and landscapes.

STABILIZERS

This model includes two sturdy, stabilizing arms. These allow you to safely operate the Equipter while in lift and dumping position.

2 ft. 11 in.

OVERALL LENGTH

7 ft. 10 in.

TOTAL WEIGHT

1,600 lbs.

ENGINE SPECS

8.5 hp.

OUR HISTORY

Aaron Beiler founded Equipter® after 15 years of running a successful residential roofing business. While working in the roofing industry, Aaron and his sons were always looking to increase profits and efficiency. They recognized that the key to this was debris removal and began creating innovative equipment to improve debris management.

Since 2004 Equipter® has continued to evolve and innovate, and we now have a line of products that help business owners in a variety of industries.

OUR MOTIVATION

Innovation drives us. That's been true since day one. Equipter® began when Aaron, with help from his family, developed a vision for a new way to work, one that would revolutionize debris management.

Quality sustains us. We started as a roofing replacement business, so we understand firsthand that contractors need equipment as tough as their crews. Every Equipter® product is engineered and manufactured to withstand daily wear-and-tear on the job site.

Relationships guide us. Since 2004, our team has worked hard to build long-term relationships based on respect and mutual trust. We enjoy personal relationships with our customers and business partners.
