

EQUIPTER[®]
STOW-A-BRAKE

STOW-A-BRAKE

THE BREAKTHROUGH BRAKE STORAGE SYSTEM

If you use an aluminum brake to wrap windows, craft flashing for chimneys and roofs, or install fascia and soffit, the Stow-A-Brake system will make your life easier. You can store your brake directly on the ladder rack on the side of your vehicle, because of its well-engineered design, it requires just one crew member (not the typical two) to set up a brake.

BENEFITS OF THE STOW-A-BRAKE SYSTEM

The Stow-A-Brake system was designed to simplify your brake storage needs. Accessing your brake this easily means you can use your brake more often and spend less time setting it up, then packing it up at the end of the day.

SAB SPECIFICATIONS

PACKAGE WEIGHT

81 lbs.

MAX BRAKE THROAT

19 in.

MAX BRAKE WEIGHT

160 lbs.

MAX BRAKE LENGTH

12 ft. - 6 in.

BENEFITS

- The Stow-A-Brake kit system comes with 4 mounting brackets that can mount onto most steel or aluminum ladder racks.
- Gas springs apply the right tension on the Stow-A-Brake system, so you can mount heavy brakes and still bring it into work position with just one person.
- To remove your brake, simply unhinge the brake lock.
- The Stow-A-Brake system extends to working height, allowing you to use your brake without removing it.

OUR HISTORY

Aaron Beiler founded Equipter® after 15 years of running a successful residential roofing business. While working in the roofing industry, Aaron and his sons were always looking to increase profits and efficiency. They recognized that the key to this was debris removal and began creating innovative equipment to improve debris management.

Since 2004 Equipter® has continued to evolve and innovate, and we now have a line of products that help business owners in a variety of industries.

OUR MOTIVATION

Innovation drives us. That's been true since day one. Equipter® began when Aaron, with help from his family, developed a vision for a new way to work, one that would revolutionize debris management.

Quality sustains us. We started as a roofing replacement business, so we understand firsthand that contractors need equipment as tough as their crews. Every Equipter® product is engineered and manufactured to withstand daily wear-and-tear on the job site.

Relationships guide us. Since 2004, our team has worked hard to build long-term relationships based on respect and mutual trust. We enjoy personal relationships with our customers and business partners.
